

A hack focused on providing information access to the underserved in Delaware.

Hack Demonstration

- Process is quick, easy, and automatic
- Can be setup at any community center
- Website allows for program to be downloaded anywhere

Focus of Hack

- Create access to critical information for underserved families and individuals
- Create access that requires no internet at home and that requires minimal tools
- Design a system that is easily transferable from community to community
- Have an inclusive that includes multiple languages

How The Hack Works

- Hack requires a of “hub”: I.E. a public library
- All user needs is a thumb drive, and access to the hub to get critical information
- Information is now downloaded onto the thumb drive and can be accessed without internet

Future Improvements

- Adding a GUI
- Instead of downloading everything, adding selection packs so people can download what they need.
- Adding more languages for accessibility.
